Viewgo modular.

We set out to design a modular multi-monitor system that offers the highest quality while remaining affordable. By carefully balancing performance, durability, and cost-efficiency, the system delivers premium functionality without unnecessary complexity. This ensures that more users can benefit from an ergonomic and future-ready workspace solution.

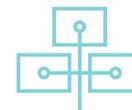

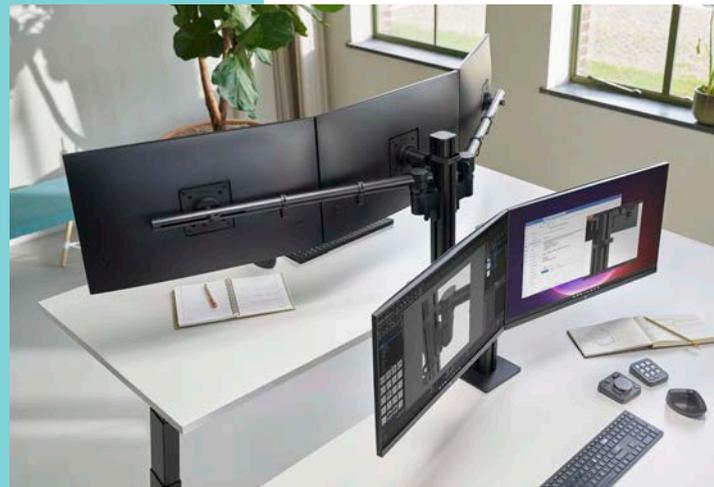

Engineered to adapt, expand, and last for years to come.

Ergonomic comfort by design

The parabolic design reduces strain, promoting comfort and focus. By positioning screens in a natural viewing curve, it helps minimize neck and eye fatigue during long working hours. This contributes to a healthier posture and a more comfortable daily workflow.

Flexible installation for any workspace

Adapters for poles, walls, and rails provide flexible installation, optimizing workspace. This versatility makes it suitable for a wide range of environments, from compact desks and dynamic collaborative settings to complex control rooms.

Endless configuration possibilities

Viewgo modular is compatible with all Viewgo pro parts, enabling a wide range of customizable configurations. Users can configure their setup to match specific tasks, preferences, or future expansions.

Start with what you need today and easily upgrade as your workspace grows and changes.

Viewgo modular.

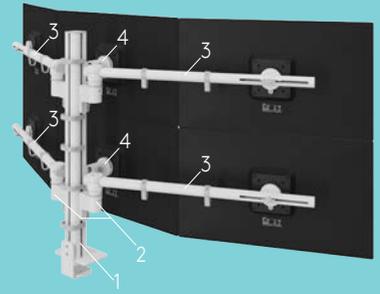

One system, countless configurations.

Within the Viewgo modular range each component is designed to adapt, upgrade, and expand your system without replacing your entire setup. Start with a single pole, then configure the desk-setup you need with wings, dynamic extensions or other modular parts to mount your monitors.

The result is a fully modular system that grows with your workspace and your needs.

All modular parts:

1. **Aluminium pole** available in two different lengths
 - 450 mm - suitable for 2-3 monitors
 - 750 mm - suitable for 3-6 monitors
2. Pole **adapter** positions on all four sides of the pole
3. **Wings** are designed to support up to 9 kg per monitor
 - Short wings fit 2 monitors from 21" to 32"
 - Long wings fit 3 monitors up to 32"
4. **Tilt head** fits 1 monitor directly to pole
